

Tools and Techniques for Speech and Language Processing

University of Illinois at Urbana-Champaign

Week 05 of 16 — Day 09 of 29

Quiz (~10 minutes)

Go over hw05 (~15 minutes)

Play time

Write a game that prompts the user to guess a word chosen at random from the English Swadesh list:

`/usr/share/nltk_data/corpora/swadesh/en`

- The game should be a bash or Python script which prompts the user for input until the word is guessed correctly.
- The input prompt should include the number of letters in the word.
- A number representing the number of correct letters in the correct position should be output to stdout after each guess.
- It would be good to check that the input is valid after each guess.
